EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

On page 36, line 17, "envelop" has been changed to -- envelope --.

The above change to the specification has been made to correct a typographical error.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art of record discloses or suggests a turbine bucket having a bucket airfoil with a profile substantially in accordance with Cartesian coordinate values of X, Y, and Z as set forth in Table I of the specification, where X and Y are distances in inches, and the Z values are non-dimensional values from 0 to 1. Such a profile improves aerodynamic efficiency and fourth stage airfoil aerodynamic and mechanical loading.

Art Unit: 3745

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jacks, Wedlake, Arness, By, and Wang are cited to show airfoils with various profiles comprised by Cartesian coordinates with X, Y, and Z values.
